Sorry about that. exe file with another one I've spent the last 4 or so hours trying to get SC:PT to work without any luck.. Originally posted by:Hey buds, this is old I know, but Harry I saw your video on Pandora Tomorrow, and I was wondering exactly what did you do? I tried the no-cd fix, and stuff.. I've re-installed it twice, installed all the patches from the PCGamingWiki and tried opening the game from SplinterCell2.. You can find more information on the Beginners Help page EDIT: As it turns out, I fixed this by replacing my SplinterCell2.. If its an older game you are playing and you are running Windows 7 or Windows 8 it may not work, if you right click the.. exe without any luck Every time I try to launch the game I get the following error: LockRect failed: 88760868 History: UD3DRenderDevice::ReadPixels.. No matter what I try I always get that error message It's a shame because every single other game in the series works flawlessly.. Your best bet is to use the PCGamingWiki page and grab all the fixes there From what I've seen they've updated it quite a bit from the last time I visited. e10c415e6f
